

## PRESS RELEASE

Montreal, March 10th, 2009

### **Belden Inc. and *mywebregistration.com* : leveraging the web for success.**

Belden is a world-class manufacturer of signal transmission products - primarily for the entertainment, residential, industrial and security markets. Belden is one of the largest U.S.-based manufacturers of high-speed electronic cables and focuses on products for the specialty electronics and data networking markets, including connectivity.

Belden recently enhanced its corporate training facilities in offering online technical training with *mywebregistration.com* web services.

‘It gives our administrators an immediate view of the customer training status for in-class and online courses. The integrated online payment system significantly reduces the invoice collection cycle. The work collaboration engendered by the *mywebregistration.com* Internet approach simplifies our management and reduces operating expenses,’ mentions Mrs. Guylaine Boisvert, Belden IBDN Training center, director.

*mywebregistration.com* makes it possible to manage different aspects of the customer training process such as registration at different locations, auto web registration, attendance and grade keeping, logistics control of course session preparation and cost and revenue maintenance.

The *mywebregistration.com* solution is a simple and efficient Internet service accessible through Internet Explorer. It does not require that the customer provide system support.

For more information, go to [www.mywebregistration.com](http://www.mywebregistration.com)
